

Visual Enterprise Architecture is a unique Global consultancy focused on the delivery of comprehensive solutions for Enterprise Architecture and Business Process Management. Our practice provides strategic guidance to ensure effective alignment of business and technology initiatives to achieve superior cost-effective results. Our VEA Solution Accelerators for Project Management, Enterprise Architecture and Governance support technology and business process optimization. As an ARIS Service and Solution partner, we deliver services for EA and BPM, Knowledge Transfer, Portfolio Management and Solution Development.

**Business Process
Performance**

VEA delivers unparalleled solutions for business process improvement throughout the entire process life cycle. From design to implementation and monitoring, we help you to succeed with your Business Process Performance initiatives and drive competitive advantage. With powerful integration, management and ERP synchronization capabilities, the ARIS Platform delivers results during process blueprinting and realization. VEA provides experience using the model-to-execution technologies such as ARIS for SAP and Oracle Business Process Analysis Suite.

**Enterprise
Architecture**

VEA provides comprehensive enterprise architecture solutions for you to manage your business strategy, business processes, information, people, services, applications and technology architecture. Driven by the ARIS Platform, the VEA solution enables our clients to analyze relationships between each of these vital components, and how they impact and support your business for success. Our consultants deliver a "Practical EA" approach with the services and solutions that guarantee results.

**Knowledge
Transfer**

VEA empowers your teams and improves their ability to deliver value and results for your organization. We offer ARIS Platform training and provide knowledge transfer choices to meet your requirements and level of expertise. ARIS Basic Training is the foundation of understanding for business process, enterprise architecture and VEA Solution Accelerators. ARIS Advanced Training builds upon the initial concepts and covers advanced ARIS topics. We also provide ARIS IT Architect, ARIS for SAP and Oracle BPA Training. Our trainers understand the only solution is training for results.

VEA Solutions

VEA Solutions are designed for clients who demand success through continuous business and technology improvements that are well-defined, measured and repeatable in an effort to meet strategic goals. Our approach begins with an architecture, technology and project framework for the long-term success of your programs and initiatives. Our structured decision-making approach to enterprise architecture and business process performance aligns strategic decisions with organizational objectives.

Business processes are the foundation of every organization. By leveraging the VEA Solution for Project Management, your organization can accelerate process performance initiatives. The ARIS Platform enables full visibility and management of your processes to drive the creation of real business value at any level. VEA delivers a structured methodology and expert guidance throughout the entire process lifecycle from project management, workshop facilitation, and training to process cost analysis, process optimization and governance.

People, Process, Information and Technology

The people in your organization require the experience and ability to design, analyze, improve and manage process excellence. The process for implementing an effective BPM program requires an understanding of what your organization does and how it impacts the business and key objectives. The information shared by the processes of your organization must be consistent. This can only be achieved through centralized project and process governance. The technology is the platform your organization uses to deliver throughout the project life cycle.

VEA Solution for Project Management

Using the VEA Solution for Project Management, your organization can realize its process performance initiatives. This approach ensures the long-term value of your process management program and delivers an invaluable asset to your organization. VEA has experience across various companies across different maturities of process management, and our consultants utilize methods to deliver solutions that are practical, repeatable and cost-effective.

Business Process Services:

Business processes drive every organization. Accurate understanding and optimization of these processes are fundamental to the creation of real business value. VEA delivers structure and expert guidance for the entire process life cycle: project management, change management, workshop facilitation, training, governance and effective program communication.

VEA's experienced consultants provide:

- Business Process Center of Excellence
- ERP Process Blueprinting and Synchronization
- Business Process Architecture and Reporting
- Process Re-Engineering
- Process Workshop Facilitation
- Process Modeling and Knowledge Transfer

VEA process consultants have experience using various modeling methods, enabling our clients to leverage their own "business language."

VEA will enable your organization to manage your Enterprise Architecture programs and initiatives. Our solution and approach combines strategy, architecture planning, business process performance, and information management to optimize your people, systems and technology. VEA drives your company to analyze, design and communicate priorities and processes for intuitive decision-making in order to achieve key business objectives and implement "Practical EA" for results.

VEA Enterprise Architecture Solution

Successful Enterprise Architecture requires an understanding of your business processes and their relationship with the technology portfolio to provide you with competitive advantages. The EA initiatives driven by the VEA Solution enables clients to create real value from the enterprise repository with an effective framework to:

- Leverage perspectives to guide business and technology value decisions
- Visualize domain-specific objectives and business value perspectives
- Deliver process improvements with strategic IT consolidation
- Define and deliver business value scorecards
- Define process and system relationships across organization layers
- Optimize Enterprise Architecture content development with automated modeling tools

Enterprise Business Value

Strategic objectives and goals should always drive the management of your enterprise architecture initiatives. You must utilize technology solutions that can be easily communicated with the business. Your organization must focus on delivering value from the EA repository. VEA accelerates the implementation and management of your EA programs with our valuable enhancements:

- Standards and Guidelines Documents
- Database Structure, Filters and Templates
- Pre-selected Model Types, Objects, Connections, Attributes and Symbols
- Pre-defined Attribute Group Views
- EA Reference Semantic Checks

VEA Services and Solutions will drive the success of your Enterprise Architecture program strategy.

Enterprise Architecture Services

VEA's experienced consultants provide:

- Enterprise Architecture Program Management
- Governance and Competency Centers
- Strategic Architecture and Transition Planning
- Business Process Architecture
- Application and Technology Architecture
- Information Architecture

All of these areas are critical components for an enterprise architecture program that provides executive management with the platform for project prioritization and investment risk analysis.

Portfolio Management

The VEA Solution follows our process-driven approach for each of your company portfolios. By objectively scoring each of these portfolios, our clients receive the information needed to visualize the key elements and successfully achieve your organization's portfolio management objectives. Analyzing each of these areas and their relationship drives the strategic decision-making process.

VEA Solution Accelerators will enable you to leverage your investment to deliver results faster. Strategic objectives and goals drive the management of your business and enterprise architecture initiatives. An effective repository means more than just creating database models. You must drive technology solutions that can be easily communicated with the business. VEA Solutions demonstrate business value using our project management and enterprise architecture real-world experience.

VEA Project Management Solution

The VEA project management solution enables you to effectively manage project content and quickly deliver results to your business sponsors. We provide the Business Process Performance framework for our clients to leverage their platform investment. You will benefit from implementing the best business process and technology modeling tool in the industry combined with reporting and analysis capabilities delivered by VEA.

VEA PROJECT MANAGEMENT ACCELERATOR

- Model Summary/Presentation Builder
- Multi Level Matrices
- Control Analysis
- Multi-Model Builder
- Function Tree Manager (Layout/Assignment) & Finder
- PM Inventory
- Model Hierarchy Numbering
- Object Perspective Update
- Process Variation Analysis

VEA Enterprise Architecture Solution

The knowledge and experience of your enterprise architects should be focused on strategic objectives and managing the alignment between technology and your business. Your organization demands value from the EA repository, and VEA helps you to minimize the configuration of the structure and views of the database. We accelerate the management and implementation of your requirements with our valuable framework and reporting solution for Enterprise Architecture.

VEA ENTERPRISE ARCHITECTURE ACCELERATOR

- EA Inventory & Connection Manager
- Application Profiler
- Application Portfolio Scoring
- Object Symbolizer
- Object Library Management
- Application Profile Model Builder
- Application Context Model Builder
- Inventory Model Builder
- Technology Life Cycle

Analysis and Reporting with Results

The knowledge you develop for your organization must be easily available for your architects and the business customers they serve. The VEA Solution Accelerators guarantee results for the continuing success of your BPM and EA initiatives. We also offer the knowledge of our experienced solution engineers to provide you with special reports that meet your requirements.

Long-term investments in your SAP Solutions demand planning, architecture, vision and knowledge management. The full understanding of your key business processes is the cornerstone of all successful SAP implementations. The combination of the ARIS Platform and SAP Solution Manager provides the foundation for your success. VEA delivers the expertise to enable your organization to manage enterprise processes and survive the changes to your support team year after year through a single, consolidated repository for your business processes.

Business Blueprinting and Realization

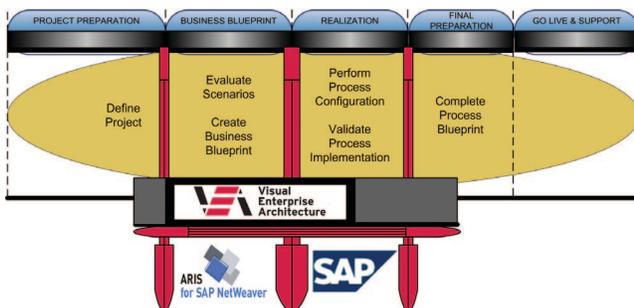

The cornerstone of an effective SAP implementation is the accurate gathering of Business Requirements. By effectively leveraging the leading process modeling tools in the industry, VEA enables customers to accelerate and significantly reduce their SAP implementation timeline. The effective management of business requirements gathering is achieved by the use of industry process reference frameworks, content synchronization and analysis to succeed in less time and improve their returns.

SAP Solution Manager and the ARIS Platform

The ARIS Platform integrates seamlessly with the primary tool for SAP implementations - Solution Manager. This integration empowers users with an end-to-end view from Project Preparation to Blueprinting and Realization. Implementation acceleration is achieved by maximizing the utilization of the Business Process Repository, Industry Best Practices and Business Process Management.

VEA provides the methodology and strategy to effectively manage this integration and create sustainable value throughout SAP implementations. We provide the structure to guarantee successful usage and drive the configuration of SAP processes and the deployment of Centers of Excellence using our "train-the-trainer" approach to knowledge services.

ARIS for SAP Services:

- Effective gathering of Business Process Requirements
- Optimization of business processes prior to ERP upgrades or implementations
- Business Process Design and Development
- Communication Plan Design for Project Content
- Business Blueprint Documentation Design and Development
- Workshop facilitation
- Global Template Design Methodology

By leveraging the leading process modeling tool in the industry, VEA enables customers to better manage their support for business requirements. Years of experience coupled with superior training mobilization will support you and your clients in the use of industry process reference frameworks, synchronization and analysis to succeed in less time and improve returns. VEA's Oracle services will speed your process innovation and narrow your company's "strategy to execution" gap.

Oracle BPA Suite

The Oracle Business Process Architect Suite (BPA) provides comprehensive modeling, analysis and simulation capabilities for enterprise wide business processes. Oracle BPA supports enterprise architecture, process improvement and change management, driving the alignment of BPM and SOA initiatives. Full integration with the Oracle SOA Suite provides closed loop BPM capability. This enables business analysts and developers to closely collaborate throughout the entire BPM lifecycle using the best tools to meet their specific needs.

Oracle BPA Suite
BUSINESS PROCESS ARCHITECT

Business Blueprinting

VEA delivers the tools and training needed for implementation, sustainable growth, and accelerated results, providing your team with the support and guidance needed for true business success. We will analyze your enterprise architecture programs, organization-wide business processes, technology assets and project portfolios to determine the best solutions to meet your objectives. The effective management of business requirements gathering is achieved by the use of industry process reference frameworks, content management and analysis to improve your results.

ORACLE® **Platinum
Partner**

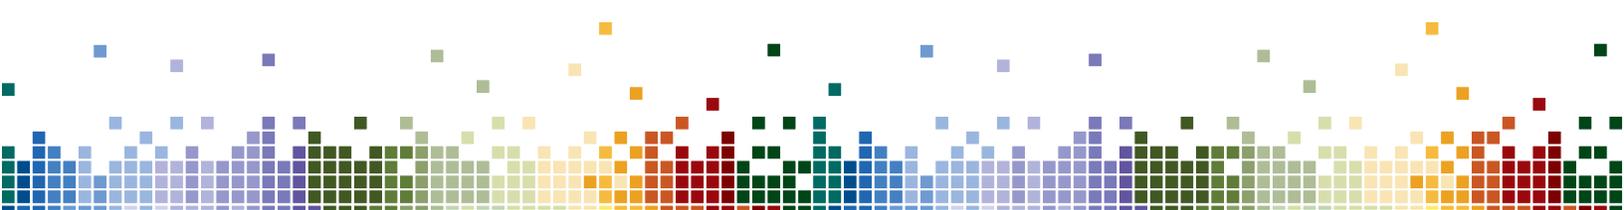

Visual Enterprise Architecture is an Oracle Platinum Partner with broad experience using the BPA Platform across various industries. We are in the unique position to provide you with valuable knowledge, incomparable experience and excellent service.

VEA Services and Solutions

VEA Services for the Oracle BPA Suite will deliver successful implementations and provide training for your project teams. Your organization will operate more effectively with business process management services to support many initiatives:

- Understand Current Business Processes
- Optimize Current Business Processes
- Build New Efficient Processes Faster
- Enable Automation of Repetitive or Non-Value Added Manual Processes
- Purchase and Implement Software More Intelligently
- Control Duplicate or Parallel Processes by Consolidating to Core Processes
- Eliminate Inefficiencies During Mergers and Acquisitions
- Provide Knowledge Transfer for Business Process Outsourcing
- Facilitate Regulatory Compliance Requirements
- Enable Scenario Building for Business Agility and Competitive Advantage
